

# INFORMATION SHEET

## CUTTING AND PASTING

### Materials:

- Scissors
- Glue
- Paper
- Whatever collage materials you want

### Why do we cut and paste:

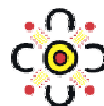

Cutting and pasting with young children gives them another opportunity to be creative it also helps them to develop:

- Fine (small) motor skills-grasping and directing where the scissors go, directing the brush.
- Intellectual skills-learning to go around the outside with the scissors, to paste.
- Social skills- as they chat with other children at the same table.

Show the children how to use scissors.

Allow children to explore cutting and pasting by themselves.

*Supervise children with scissors at all times.*
